***PaRR Inspections selects
System Concepts, Inc.
for RFID Asset Tracking Enterprise / Field Solution***

5 October 2006 - High Point, NC - System Concepts, Inc (SCI), a leading RFID software application and solution provider for the multi-billion dollar RFID industry, announced today that it has been selected by PaRR Inspections (www.parrinspections.com), a Joint Venture of Dewberry & Davis, LLC and URS Corporation, to incorporate its TraxWare[®] software solutions for tracking assets via Radio Frequency Identification (RFID). SCI will implement one of its proven asset tracking solutions; AssetTrax[™] in PaRR's Winchester, VA warehouse along with field sites across the country. SCI will integrate TraxWare with PaRR's Warehouse Management System to create one of the first enterprise-level Asset Tracking RFID warehouse management installations responsible for tracking US Government property. The systems will be used to track Federal Emergency Management Agency (FEMA) inventory utilized during federally declared disasters. This move re-affirms the technical leadership that has kept PaRR Inspections at the technology forefront.

TraxWare for RFID Warehouse Tracking for Assets incorporates SCI's OnPortal[™] RFID portal system with Generation 2 RFID interrogators, RFID Portables and Printers to ensure a quick and reliable implementation.

PaRR Inspections' Housing Inspection Services involve collecting and reporting required information from applicants whose houses have been damaged by federally declared disasters. A wide range of information is collected during the inspection, e.g., physical damage to the house, ownership, occupancy, insurance, personal property losses, photographs, and other essential information regarding disaster-related expenses and/or existing needs. FEMA then determines the type and amount of financial assistance the applicants are eligible for; based on the information that is collected and recorded on pen-based computers by PaRR Inspectors during physical home inspections.

L. Allen Bennett, President and CEO of System Concepts, Inc. said, after being selected by PaRR Inspections; "I must applaud PaRR Inspection's Project Director Doug Frost for his vision and resourcefulness to investigate and utilize RFID technology to assist them in tracking government property. This will be one of the first scalable RFID Asset Tracking Installations for a large government agency in Washington and surrounding areas."

Traxware[®] RFID solutions from System Concepts, Inc. (www.sysconcepts.com) are available to all government agencies and corporations that need a cost effective ability to track inventory and assets. Please contact the company at 877-822-0200 or email at sales@sysconcepts.com to request more information about its RFID solutions.

About System Concepts, Inc.

Founded in 1984, SCI provides RFID and AIDC software solutions that enable successful RFID installations in the manufacturing, process control, asset tracking and EPC/DoD compliance markets. SCI's solutions leverage the company's RFID expertise and generate a lasting and measurable impact for customers transitioning to RFID technology. The company's flagship product, TraxWare[®], is deployed in RFID operations, large and small.
