

***Social Security Administration selects
System Concepts, Inc.
for RFID Enterprise Solution***

17 April 2006 - High Point, NC - System Concepts, Inc (SCI), a leading RFID software solution provider for the multi-billion dollar RFID industry, announced today that it was selected by the Social Security Administration (SSA) to incorporate its TraxWare® for RFID Warehouse Tracking software solution into each of its five warehouse locations in the Baltimore and surrounding area. SCI will integrate TraxWare with SSA's Warehouse Management System from Radio Beacon (www.radiobeacon.com) to create one of the first enterprise-level EPC/DoD compliant RFID warehouse management installations in the US Government. The system is being used to track inventory for internal and external SSA customers. This move re-affirms the technical leadership that has kept the Social Security Administration at the technology forefront.

TraxWare for RFID Warehouse Tracking incorporates SCI's OnPortal™ RFID portal system with Generation 2 RFID interrogators, and SCI's PrintTrax™ printer server to ensure a quick and reliable EPC/DoD compliant implementation. OnPortal and PrintTrax enable efficient deployment by utilizing off-the-shelf RFID hardware from major RFID manufacturers.

The Social Security Administration ships more than 240,000 line items from their five warehouse facilities and was having difficulties keeping accurate inventory location and shipping transaction records. The agency has been able to save *\$1.3 million per year* by integrating Radio Beacon's warehouse management software and is looking forward to additional annual savings through the use of RFID technology in the warehouse as well as shipping and receiving. Gary Orem, SSA's RFID Project Manager; has been very pleased with System Concepts' technology vision and services, its software flexibility and hardware that works! Mr. Orem has been one of the true pioneers of RFID and continues to implement corporate wide solutions into the agency that increase operational efficiency while saving significant taxpayer dollars.

L. Allen Bennett, President and CEO of System Concepts, Inc. said, after being awarded the project, "This will be one of the first "enterprise" RFID installations at a large government agency in Washington and surrounding areas. The leaders at Social Security Administration are true visionaries. They continue to introduce cost saving measures into their warehouse operations, where other companies and agencies just talk about it!"

Traxware RFID solutions from System Concepts, Inc. are available to all government agencies under GSA. Please contact the company at 1-877-822-0200 or email at sales@sysconcepts.com to request more information about OnPortal and its RFID solutions.

About System Concepts, Inc.

Founded in 1984, SCI provides RFID and AIDC software solutions that enable successful RFID installations in the manufacturing, process control, asset tracking and EPC/DoD compliance markets. SCI's solutions leverage the company's RFID expertise and generate a lasting and measurable impact for customers transitioning to RFID technology. The company's flagship product, TraxWare®, is deployed in RFID operations, large and small.
