SCANSOURCE RFID SOLUTIONS GROUP HELPS RESELLERS COMPLY, CLOSE THE DEAL

GREENVILLE, SC – August 25, 2005 - ScanSource, Inc., (Nasdaq: SCSC), a leading international value-added distributor of specialty technology products, has created the RFID Solutions Group, which consists of current ScanSource resellers who are early adopters of RFID and are experts in selling and supporting RFID solutions, to ensure all resellers can take advantage of RFID opportunities in their customer base. The RFID Solutions Group is another innovative addition to the ScanSource RFID Edge™ program, which was designed to help solution providers be successful in selling, installing and supporting RFID solutions.

Resellers who have not completed vendor certification programs to sell RFID or those needing additional assistance in selling RFID solutions can contact ScanSource to be matched up with a member of the RFID Solutions Group to support them in closing the sale and installing and supporting the solution. The Group can provide as little or as much assistance as the reseller needs, from providing middleware or edgeware software solutions, to delivering site surveys, software, hardware and installation services.

By working with the RFID Solutions Group, resellers can make the most of opportunities that they otherwise might have to turn down because of limited RFID experience. Members of the Group are highly trained and experienced in delivering RFID solutions.

“In order to meet the needs of the nearly 60,000 plus end users under mandate for RFID compliance from the Department of Defense, Wal-Mart and others, there must be enough resellers available to deliver the solutions,” said Paul Constantine, vice president of solutions and services, ScanSource, Inc. “In effect, our RFID Solutions Group expands the environment of qualified resellers. They will provide the assistance

our resellers need to strengthen their current customer relationships and to build new ones.”

Currently, the RFID Solutions Group is comprised of the following software partners:

Enterprise Information Systems

Miles Technologies

IDentiTrak Technologies

System Concepts

For more information on the RFID Solutions Group, call 1.866.370.6712 X 4323.

About ScanSource, Inc.

ScanSource, Inc. is a leading international distributor of specialty technology products, including automatic identification and data capture (AIDC) and point-of-sale (POS) products through its ScanSource sales unit; Avaya communications products through its Catalyst Telecom sales unit; communications products from Intel and NEC through its Paracon sales unit; and electronic security products through its ScanSource Security Distribution unit.

The Company serves the North America marketplace and has an international segment, which sells AIDC and POS products in Latin America and Europe. Founded in 1992, the Company markets products from more than 100 technology manufacturers to over 16,000 value-added technology resellers and is committed to empowering them with tools and services designed to help them grow.
